ANTOINE COLLAS

antoine.collas@inria.fr — www.antoinecollas.fr

PERSONAL DETAILS

- Address: Sceaux (Paris area), France
- Age: 28 years old
- Nationality: French
- Languages: French (mother tongue), English (proficient)

RESEARCH INTERESTS & EXPERTISE

Applied mathematics, machine learning and signal processing:

- Machine learning: domain adaptation, optimal transport, ...
- Statistical signal processing: robust statistics, estimation, bounds, optimization on Riemannian manifolds, ...

Applications:

- Remote sensing: Hyperspectral and SAR images, time series
- Biosignals: Magneto- and Electro-encephalography (MEG/EEG), functional Magnetic Resonance Imaging (fMRI)

EXPERIENCE

Part-Time lecturer at CentraleSupélec and University Paris-Saclay November 2020 - April 2024
Teaching assistant at graduate level in applied mathematics *Gif-sur-Yvette, France*

- Optimization: convexity, duality, linear programming, ...
- Digital signal processing: Fourier analysis, linear regression, stochastic process, statistical estimation, ...

Postdoctoral researcher at INRIA Saclay November 2022 - Present
Postdoc in machine learning *Palaiseau, France*

- MIND Team (ex-Parietal), supervisors: Bertrand Thirion, Alexandre Gramfort, Rémi Flamary
- Domain adaptation using Riemannian geometry applied to M/EEG and fMRI data

R&D intern at Safran Electronics & Defense February 2019 - July 2019, 6 months
Computer vision - Deep learning *Eragny, France*

- Deep learning: object detection, style transfer
- Few-shot learning

EDUCATION

Qualification to Maitre de conférences positions 2022

- Sections 61 (signal processing) and 26 (applied mathematics)

PhD at SONDRA lab, CentraleSupélec October 2019 - October 2022
Riemannian geometry for statistical estimation and learning: application to remote sensing *Gif-sur-Yvette, France*

- Supervisors: Jean-Philippe Ovarlez (CentraleSupélec & Onera), Guillaume Ginolhac (Univ. Savoy Mont Blanc), Chenfang Ren (CentraleSupélec), Arnaud Breloy (Univ. Paris Nanterre), Florent Bouchard (CentraleSupélec)
- Jury: Audrey Giremus (Univ. Bordeaux), Nicolas Le Bihan (Univ. Grenoble Alpes), Cédric Richard (Univ. Côte d'Azur), Nicolas Boumal (EPFL), Alexandre Gramfort (Meta & Inria)
- Statistics: estimation, intrinsic Cramér-Rao bounds
- Riemannian geometry: optimization and machine learning
- Applications: hyperspectral and SAR images, earth observation

University of Shanghai - UTSEUS 2016
Exchange student *Shanghai, China*

- One abroad semester in China studying Computer Science

University of Technology of Compiègne - UTC 2014 - 2019
Diplôme d'ingénieur- Engineering degree *Compiègne, France*

- Major: Computer Science
- Minor: Applied Mathematics
- Obtained the "Mod Math" (mathematical modelization) label in Applied Mathematics

COURSES, WORKSHOPS AND SUMMER SCHOOLS ATTENDED

Courses

- "Introduction to Riemannian geometry: application to optimization for the estimation of covariance matrices", given by Florent Bouchard (CNRS/CentraleSupélec) - 14h - Annecy, France - 2020

Workshops

- "5th Sondra Workshop" (link) - Invited speaker - Avignon, France - 2022
- "Statistical Learning for Signal and Image Processing (SLSIP) Workshop" (link) - Invited speaker - Rüdesheim am Rhein, Germany - 2020

Summer schools

- "LOGML, London Geometry and Machine Learning, 2021" (link) - 30h - University College London and Imperial College London. Application of Riemannian optimization algorithms to optimal transport problems, mentored by **Bamdev Mishra**, creator of *Manopt* the leading toolbox of optimization of Riemannian manifolds - 2021
- "Data Sciences for Geosciences 2020" (link) - 30h - ENSEEIHT Toulouse, France - 2020

TALKS

- **Title:** "Riemannian geometry for statistical estimation and learning: applications to remote sensing and M/EEG" - OPIS Seminar, CentraleSupélec, Gif-sur-Yvette, France - 2024
- **Title:** "Riemannian geometry for statistical estimation and learning: applications to remote sensing and M/EEG" - TAU Seminar, LRI, University Paris-Saclay, Gif-sur-Yvette, France - 2023
- **Title:** "Riemannian geometry for statistical estimation and learning: applications to remote sensing and M/EEG" - S3 Seminar, L2S, CentraleSupélec, Gif-sur-Yvette, France - 2023
- **Title:** "Optimal transport and dimension reduction: Entropic Wasserstein Component Analysis" - ELLIS Unconference, HEC, Jouy-en-Josas, France - 2023
- **Title:** "Entropic Wasserstein Component Analysis" - SIMPAS team, Centre de Mathématiques Appliquées de l'Ecole Polytechnique, Palaiseau, France - 2023
- **Title:** "Estimation and classification of location and covariance matrix using Riemannian geometry: application to remote sensing" - Laboratoire Jean Kuntzmann seminar, Grenoble, France - 2023
- **Title:** "On The Use of Geodesic Triangles Between Gaussian Distributions for Classification Problems" - 5th Sondra Workshop, Avignon, France - 2022
- **Title:** "Optimization and statistical learning using Riemannian geometry: application to remote sensing" - DSO National Laboratories, Singapore - 2022
- **Title:** "Optimization and statistical learning using Riemannian geometry and application to remote sensing" - Inria Saclay, Parietal team, Palaiseau, France - 2022
- **Title:** "Robust Clustering for Satellite Images Time-Series" - ONERA, the French Aerospace Lab, Palaiseau, France - 2022
- **Title:** "Probabilistic PCA from Heteroscedastic Signals: Geometric Framework and Application to Clustering" - Statistical Learning for Signal and Image Processing (SLSIP) Workshop, Rüdesheim am Rhein, Germany - 2021
- **Title:** "Riemannian Geometry to Robust Estimation Covariance Matrices with Application to Machine Learning" - LISTIC laboratory, Annecy, France - 2021

PUBLICATIONS

* indicates equal contribution.

Preprints

AWARD

· **Best Student Paper Award** at the EUSIPCO 2022 conference, Belgrade, Serbia.

SOFTWARE

- **Maintainer of SKADA:** Python library for domain adaptation with a scikit-learn and PyTorch/skorch compatible API - link - 2023 - present
- **Maintainer of Pymanopt:** Python library for optimization on Riemannian manifolds with support for automatic differentiation, implementation of several Riemannian manifolds (complex Grassmann, vectors with strictly positive entries, ...) - link - 2020 - present
- **Contributor of Python Optimal Transport (POT):** Python library for optimal transport, implementation of entropic Wasserstein component analysis - link - 2023 - present
- **Contributor of Geomstats:** Python library for computations and statistics on manifolds with geometric structures, contribution to the information geometry package - link - 2022
- **Creator of pyCovariance:** Python library for statistical estimation and clustering/classification on Riemannian manifolds - link - 2019 - 2022

REVIEWING SERVICE

- Journal: **Reviewer IEEE Transactions on Signal Processing**
- Conferences: **Reviewer Neurips** (2022, 2023, 2024), **ICML** (2023, 2024), **ICLR** (2023)

COMPETITIONS

- **Kaggle**: "Gendered pronoun resolution". Competition of natural language processing on a coreference problem: pair pronouns to their correct entities - **Result: 31/838** - 2019
- **Kaggle**: "Recursion Cellular Image Classification". Competition of computer vision: disentangling biological signal from experimental noise in cellular images - **Result: 42/865** - 2019
- **Conference CAP 2018**: "Predicting English level by analyzing writing styles". Competition of natural language processing - **Result: 5/14** - 2018

TECHNICAL SKILLS

- **Machine learning and scientific computing:** Python, PyTorch, Tensorflow, Scikit-learn, Matlab, R
- **Optimization on Riemannian manifolds:** Manopt, Pymanopt
- **Version control:** Git
- **Cloud computing:** AWS, GCP
- **Front-end:** Javascript, React, HTML/CSS
- **Back-end:** Python, C++, SQL
- **Other:** LaTeX
